

# Pathway to Communication Vol.1

~for Therapists & Clients~

## ■ About this CD

- This CD is made for people who use music in welfare, educational facilities, and relaxation salons, particularly sensory rooms.
- All tracks have been carefully designed so that a care giver can combine any of the tracks and select the desired length of time, depending on the therapy.
- High frequency sounds(around 20 kHz) have been reduced as much as possible, in order to create a calm atmosphere.
- All tracks have been composed so that that the listener does not need to concentrate on the music, which allows them to be fully engaged in the therapy.  
Unlike most therapeutical music, we have intentionally left out parts that are easy to remember. However, we have taken care to ensure that all tracks are suitably balanced and therefore can be simply enjoyed as music.

## ■ How to optimize usage

This CD is composed of four pieces.

You can select the desired time frame of one or a combination of tracks, for example, 30 minutes, 40 minutes, 45 minutes, 50 minutes, 60 minutes.

(Preparation time before the therapy is taken in to account, so each track is 3~5 minutes shorter).

For example, for a playing time of 45 minutes, we would like to recommend using track 3 and 4.

Please use the CD in accordance with your therapy time.

### 《Recommended combination》

	30min	40min	45min	50min	60min
Track1 09 : 56					
Track2 15 : 01					
Track3 20 : 47					
Track4 21 : 01
